

**SpeCie LLC**

**Helping build empires one at a time**

The global economy is transitioning into a new era called the Fourth Industrial Revolution. With the Legacy Financial System or SWIFT becoming high-risk due to Quantum Computers, most of the population will be clueless on how to handle their finances. They aren't sure on how to protect their investments or how to invest in general. They use this excuse to become a procrastinator. Luckily you can avoid doing what the vast majority do by becoming a member of SpeCie LLC.

SpeCie LLC is a digital currency services/consultant company that coaches investors on how to handle any asset the correct way. When you officially become a member of SpeCie LLC, you will receive SPEC token to learn how to do the following:

- . Stake SPEC token to earn passive income.
- . Stake SpeCFTs (NFTs) to earn monthly passive income.
- . Diversifying your portfolio with Real World Assets (RWA).

- . Earn daily income of SPEC inside AMM/Liquidity Pools.
- . Learn about Private Banking by borrowing money from your assets.
- . Learn about Precious Metals, Wholesale Life Insurance, and other financial tools.
- . Watch Created presentations to better understand how to increase your financial stability.

To become a member of SpeCie LLC, you will have to join SPEC talk. SPEC talk is a membership class that gives in-depth conversation and talks about strategic ideas for Financial Freedom. Next, you will have to buy a segment to receive airdrops of SPEC token.

**WARNING:**

**NEVER** sell all of your SPEC tokens. This token is **NOT** a memecoin! SPEC token is used to teach investors on how to earn passive income on Blockchain. If you break this rule, you'll be permanently banished and your membership will be revoked.

SpeCie LLC also accepts accredited investors, businesses, and corporations as members whether they are profit or non-profit. Surprisingly, many do not know about the importance of learning about Quantum Computers and Quantum Resistant Technologies. SpeCie LLC is currently collaborating with a few other businesses and will continue looking for more to collaborate with. In conclusion, the agenda is to build together and brainstorm ideas in the upcoming new age financial system.
